ABSTRACT OF THE DISCLOSURE

1	A convertible cargo bed cover can function as both a tonneau cover and a
2	cargo bed cap. The cover is raised by motorized elements to be substantially
3	aligned with a roof of a passenger cabin of the vehicle. Side and rear window
4	panels stored inside the cover can be installed to transform the cover to a cap to
5	enlarge available enclosed cargo space. Rear pillars are installed at the rear
6	corners of the tonneau cover in its raised position to complete the installation.
